## Accomplishments

**Assessment** Utilize concussion management software technology and a cutting-edge neuropsychological approach to aid teens, parents, adults, and coaches make informed decisions about returning to contact sports, returning to work and to regular physical activity.

At NeuroPro Concussion Clinic, the assessment approach in personal injury cases is grounded in a comprehensive, evidence-based methodology that integrates neurocognitive testing, clinical interviews, and functional evaluations to accurately diagnose mild traumatic brain injuries. Evaluations are tailored to the unique circumstances of each case, with particular attention to mechanism of injury, symptom presentation, and validity testing to ensure diagnostic clarity. This rigorous approach supports both treatment planning and medico-legal documentation, providing clear, defensible findings for attorneys, insurers, and medical professionals..

**ADHD/LD Evaluations** Directed a *model* Educational and Developmental Intervention Services Program. Reduced return rate of military children from overseas in the Exceptional Family Member Program to less than 1%. Innovative clinician utilizing neuropsychological approach that assists parents, teachers, and children adjust to and manage mental and behavioral conditions.

**Innovative Research** Co-investigator awarded joint projects with Yale Medical School, Army and Navy designed to investigate: the physiological differences between typical service members and Special Forces personnel, and the use of physiological variables in the detection of deception. Requested guest reviewer of several journals: *The Journal of Intelligence Community Research and Development* and *Military Psychologist*.

**Dynamic Professor** Taught multiple psychology classes at Naval Academy and Johns Hopkins University; consistently rated a top professor at both universities. Psychological consultant for the Leadership, Ethics, and Law (LEL) department training over 4,000 midshipmen a year. Assessment consultant for LEL department and entire Naval Academy assessing effectiveness of teachers and classes throughout the Naval Academy.
