

**IPS**<sup>®</sup> Preprosthetic  
*and* **YOU**

# IPS®

## Every one is unique

### ***What is IPS® Preprosthetic?***

KLS Martin is proud to provide the only FDA-cleared, remotely fixated, subperiosteal dental rehabilitation system in North America. This implant system presents an excellent option for those patients affected with severe bone loss, previous jaw resection, or who have undergone reconstructive surgery without dental implant placement. Our patient-specific devices, designed by our Individual Patent Solutions (IPS®) engineers in tandem with your physician, allow for dental restoration at the time of surgery.

# IPS® Individual Patient Solutions

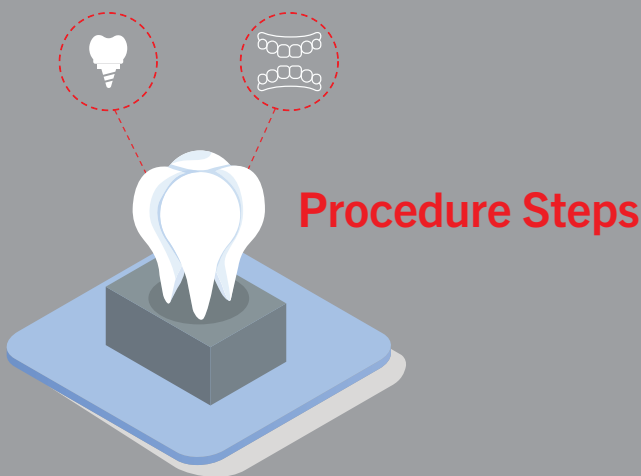

KLS Martin uses state-of-the-art manufacturing methods, including 3D printing and high-precision milling, to produce patient-specific products with sub-millimeter accuracy. Implants, surgical guides, and anatomical models are all manufactured in-house at our North American headquarters in Jacksonville, Florida.

# IPS® Preprosthetic *may be an option* if **You**

- Have insufficient bone stock for traditional dental implants
- Require jaw reconstruction
- Experienced facial trauma
- Are seeking an alternative to zygomatic implants

## **1** Initial Consultation & Imaging

Your surgeon will collect medical data for future fabrication of a patient-specific implant.

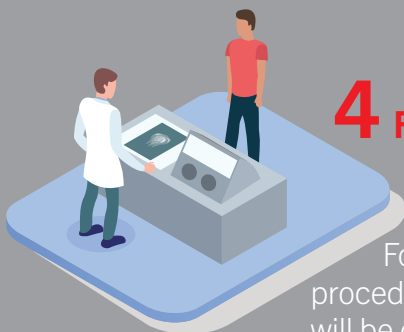

## 2 Digital Planning

KLS Martin engineers work directly with your surgeon to generate a treatment plan tailored to your anatomy.

## 3 Custom Plate & Prosthesis

A patient-specific titanium plate is created, allowing for immediate placement of a temporary prosthesis or denture.

## 4 Final Prosthesis

Following the procedure, more imaging will be completed in order to provide a permanent denture for optimal aesthetics and function.

# Why Choose **IPS**<sup>®</sup> Preprosthetic?

## **Comprehensive Care**

A single solution for full or partial dental arch rehabilitation.

## **Digital Precision**

Advanced 3D modeling ensures a perfect fit tailored to your anatomy.

## **Customized Process**

Fewer appointments and faster treatment when compared to traditional methods.

## **Collaborative Approach**

Surgeons and engineers work together to provide high-quality, personalized care.

## ***Discuss With Your Surgeon***

If you are interested in IPS® Preprosthetic, talk to your surgeon about whether this solution is right for you. They can review your imaging, bone structure, and treatment goals to determine suitability.

**Your** Journey to a  
Confident Smile  
Starts **Here**
