# REPAIR AND PREVENT ACCUMULATED DAMAGE

---

ARIELLE N.B. KAUVAR, M.D.  
BOARD CERTIFIED DERMATOLOGIST  
NEW YORK LASER & SKIN CARE  
1044 FIFTH AVENUE  
NEW YORK, NY 10028

"At night, your skin uses its sleep cycle to repair accumulated daytime damage caused by free radicals. Free radicals are unstable molecules that damage healthy cells, causing accelerated signs of aging, like loss of radiance, elasticity and density. The skin has a powerful natural antioxidant defense system that helps to enhance self-repair from free radical damage. However, as we age, our natural antioxidant defense system weakens and skin loses its efficiency to repair at night.

New research shows that resveratrol is a unique antioxidant that helps fight internal free radicals by boosting skin's own antioxidant defense system. This is why resveratrol is helpful for restoring nighttime repair.

Resveratrol is a potent antioxidant that has been PROVEN to help sustain healthy longevity by neutralizing intracellular free radical damage and helping to repair the visible effects of age-accelerated skin.

However, due to the natural instability of the molecule, it has been difficult to formulate with meaningful concentrations of resveratrol until now."
